CONFIDENTIAL

Dear Sir/Madam,

Touch Building Services Limited

We have used the services of Touch Building Services Limited at the Royal Berkshire Hospital, Reading to supply install and commissioning new electrical Main LV switchboard in one of the buildings on the site and associated activities including user liaison and co-ordination.

The on site project manager reacted pro-actively to issues that arose with trying to keep the site critical infrastructure in the building fully functional whilst changing a major item of electrical infrastructure. There was positive feedback from clinical user groups, the maintenance teams and the emergency planning team

We have found the site team to be professional, flexible and responsive to user needs and requirements.

Yours faithfully

John Moloney
Associate - Building Services
RBH Authorising Engineer Electrical (HV and LV)
